DEFINING A **WORLD OF COMFORT** WITH RADSON

ONE SUPPLIER, MULTIPLE BENEFITS

In a world of choice, few things are simple. As an architect or specifier, you are faced with countless decisions every day, as you work to ensure your plan comes perfectly to life. Thankfully, there is one decision we can help you with— which supplier to choose when you're working on how best to provide the perfect indoor comfort for your project.

LONG HISTORY OF RELIABILITY

Radson is part of Rettig ICC, a global leader in radiators and underfloor heating. One supplier, with a vast array of products and an international logistics network to make sure they reach you on time, every time.

PROVEN AND TRUSTED

When you choose Radson, you choose a reliable partner with almost 50 years of experience.

We pride ourselves in being the first choice for architects and specifiers the world over. They keep coming back because of our quality, reliability and service. Take a look at what we offer in the following pages. Then we hope you have one less choice to make.

HOSPITALS AND NURSING HOMES

PRESERVING A HYGIENIC ENVIRONMENT CAN BE A CHALLENGE, ESPECIALLY IN AREAS OF MULTIPLE OCCUPANCY. **THE HYGIENE RANGE IS DESIGNED SPECIFICALLY FOR SUCH ENVIRONMENTS.**

INTEGRA HYGIENE 

HOSPITALS AND NURSING HOMES

INTEGRA
HYGIENE

Twin benefits

The Integra Hygiene has two purposes: to provide warmth, and to stay clean. The Integra model is made from cold rolled stainless steel and is coated in epoxy paint, which makes it resistant to chemical cleansers. This radiator provides comfortable warmth and is available in multiple finishes, type 10, 20 and 30, in a range of lengths from 450 mm up to 3000 mm.

Minimal surface area

We understand the challenges of working in a hygiene-controlled environment. That's why the Integra Hygiene is built without convection fins, to minimise surface area while still producing controllable, comfortable warmth.

INTEGRA HYGIENE

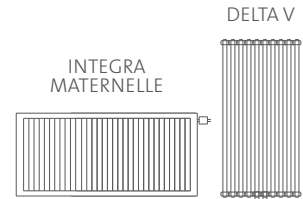

SCHOOLS AND KINDERGARTENS

WHEN INQUISITIVE MINDS WITH BUSY HANDS ARE
PART OF YOUR DESIGN, THE DELTA AND MATERNELLE
ARE PERFECT FOR WARMTH AND SAFETY.

DELTA

SCHOOLS AND KINDERGARTENS

Safe and warm

Keeping warm and staying safe are the reasons behind the Delta design. Its solid, curved design means no sharp edges which makes it easy to clean as well.

The Delta brings old-school charm up to date with a modern design. We also

offer a wide range of underfloor systems, suitable for new build projects.

Safe to touch

Thanks to the Maternelle design, you still enjoy the same comfortable warmth from a surface area that won't burn small fingers, because of the none

waterkeeping front plate. This makes the Maternelle ideal for kindergartens but is also a great solution for renovation projects. Our standard Integra radiator fits perfectly in any other school environment.

OFFICES AND PUBLIC BUILDINGS

BUSY SPACES DEMAND
DISCREET HEATING.

**RADSON'S PLINTH RANGE IS
PERFECT FOR THE JOB.**

RAMO PLINTH

OFFICES AND PUBLIC BUILDINGS

Out of sight

For areas where space is constantly in use, choose a radiator that works in the background. Something that does the job discreetly and efficiently.

Blends with any décor

Whether you choose the Integra, Ramo or Parada, our plinth range is suited to both new and existing offices and public buildings and are available with design feet.

Reliable meets functional

The sleek design of our plinth products brings together the best of Radson's engineering skill. And of course, the Integra, Ramo and Parada all come with our 10 year quality guarantee.

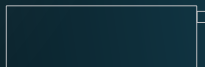

Classic, modern, elegant

Offices and public buildings have a variety of uses, but all share the same need for comfortable warmth. Our plinth range has been designed to meet that need perfectly.

INTEGRA PLINTH

PARADA PLINTH

RAMO PLINTH

All our Plinth radiators have a height of 200mm and are available in types 22, 33 and 44 with lengths up to 3000mm. The Plinth radiators are available in standard RAL 9016. Other RAL or metallic colors on request.

HOTELS AND WELLNESS

GUESTS DESERVE COMFORT, AND RADSON HAS THE PERFECT RANGE OF **STYLISH PRODUCTS DEDICATED TO MEETING THAT NEED.**

FARO

HOTELS AND WELLNESS

KOS

KOS V

KOS H

FARO V

FARO H

When comfort is key

When you run a business for guests, you understand that their comfort is key. The Kos and Faro range provides elegant warmth effortlessly.

Easy clean

Busy hotels or spas have strict standards of cleanliness. Which is why the sleek design of the Kos and Faro are presented with surfaces that are simple to clean.

Stylish design

Flat panel or profiled front, the Kos and Faro range brings style to any space. The minimal design keeps pipework out of sight, so guests can enjoy their stay without distraction.

Galvanised radiators for bathrooms

Radson has a wide range of options for bathrooms too. These are specially galvanised, protecting them from constant humidity. Ideal in combination with our underfloor heating products.

RESIDENTIAL SPACES

IF YOU ARE WORKING ON A HOUSING ASSOCIATION OR SIMILAR PROJECT, **LOOK NO FURTHER THAN THIS DEDICATED RANGE OF RADIATORS.**

TINOS

RESIDENTIAL SPACES

TINOS

PAROS
(CURVED)

ELATO ET

Vertical beauty

Vertical radiators add elegance and style to any room. At the same time, they are also perfect for those areas where space is at a premium. The Tinos, Paros and Elato ET are designed to add warmth and style to any residential space.

Extra comfort with Turbo-function

The Elato ET is an electric radiator, for those projects where radiator plumbing is not an option. The Turbo function will release a homogenous and silent flow of hot air, which realises a comfortable heat in a short period of time.

The modern touch

If you are working on a newbuild project that demands the very best in appliances and fittings, this range comes in a range of sizes and outputs to suit your needs.

HEATING & COOLING

The world's coolest
'radiator'

MULTI-PURPOSE AND RESIDENTIAL SPACES

SOMETIMES YOU NEED TO BE WARM,
SOMETIMES YOU NEED TO COOL DOWN.

**RADSON HAS THE PERFECT PRODUCT
THAT OFFERS BOTH.**

VIDO

THE WORLD'S COOLEST 'RADIATOR'

Rapid heat

The Radson Vido is designed for spaces with fluctuating temperature needs. Energy efficient and fast-acting, the Vido heats the room very quickly, maintaining an accurate temperature through its sensitive and reliable thermostat.

Rapid cool

In buildings that enjoy a lot of summer light, the indoor environment can sometimes become uncomfortably warm. Thanks to the Vido's condensate pump, it can cool the room to a comfortable temperature quickly and accurately.

2 and 4 pipe connection

The five available models in the Vido range are all suited to 2- and 4 pipe connections, providing rapid, accurate temperature control all year round.

User friendly

Although the Vido provides both heating and cooling in one compact product, it is incredibly easy to use. A range of automatic and user-defined programs are available, providing total control at a single touch.

VIDO

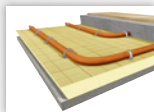

UNDERFLOOR HEATING

IF YOU ARE WORKING ON A HOUSING ASSOCIATION OR SIMILAR PROJECT, **INCREASE YOUR COMFORT WITH UNDERFLOOR HEATING.**

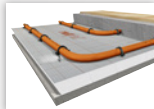

Noppjet / Noppjet S

- System plates make it ideal for one-man installation
- Thermal and acoustic insulation
- Symmetrical design – uniform heat distribution
- Can be installed up to 45-degree corners for full room coverage
- Choose Noppjet 11S for slim building height (max. 60mm) and optimal floor stability

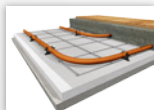

Purjet / Purjet S

- Fast and easy installation. (Safe installation thanks to special V-clip)
- Thin, dynamic system
- Used with sprayed polyurethane insulation for time-saving installation
- Thermally insulated

Rolljet / Rolljet S

- Fast and easy installation (Supplied in rolls of insulation)
- Rolljet S provides a dynamic and thin system
- Available in several thicknesses of thermal and thermal-acoustic insulation

Clickjet / Clickjet S

- Ideal for larger / industrial projects
- Composed of 3mm steel grid, with pipes secured by special clamps
- Pipe system fully enclosed by screed
- Ideal for projects with existing insulated floors
- Clickjet S offers a thin and dynamic system

TS-14

- Low weight and low build height – ideal for multifloored timber buildings
- System of profiled EPS panels for easy installation
- Heat conductors with additional plate for optimal heat diffusion
- Can be covered with screed or dry panels

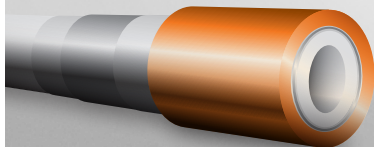

PexPenta

- PexPenta is a highly qualitative tube for underfloor heating, with 5 layers and a centrally integrated oxygen barrier
- The tube is developed to function reliably and optimally within an underfloor heating system

RADIATORS & UNDERFLOOR HEATING

The perfect combination

Radson underfloor heating is perfect in combination with its radiators. Ideal for use in bathrooms or hallways, underfloor heating provides a luxurious extra warmth.

Long gone are the days when underfloor heating was reserved for high end projects. Our wide range of affordable, reliable underfloor systems is within the reach of more people than ever.

DEFINING
**THE COLOUR
OF COMFORT**

The real reason radiators are painted white is so that they match the neutral colour of most interior walls. But tastes change, décor develops, and **today many people dare to be different.**

CI FEVER COLOUR
