Vertical-radiator in width 300 mm

- Vertical-radiator with profiled front panel.
- Accessories included in the packaging and the price : brackets, 2 side covers, installation clips, 1 bore template, 1 rotating airvent, 3 blind stops, screws and plugs.
- Installation : U2V-bracket.
- Connections : 6 x \varnothing 1/2". (Note : with type 22 the connecting valve is located eccentrically in the radiator.)
- If one does not connect the radiator using the connecting valve, short-circuit current can originate so the radiator heats less.
- Radiator is reversible top / bottom.
Note : with top connection one must turn the radiator around and a minimum water column head of 3 m is required for the radiator supply, and this with a minimum flow rate of 150 l/h.
- A vertical radiator can be used in 2-pipe systems and in 1-pipe system, when the valve set is used.

- Colours :
Standard colour is RAL 9016.
Other available colours incl. metallic colours : see technical pricelist.
- Accessories :
See technical pricelist.

Vertical

installation

U2V-bracket

type 20C + 21C

- a : 106 mm
- b : 65 mm
- c : 25 mm

type 22C

- a : 131 mm
- b : 65 mm
- c : 25 mm

connections

Other connections are not possible.

Note: with type 22 the connecting valve is located eccentrically in the radiator.
